

Fact Sheet

SculpSure is the world's first light-based body contouring system for the reduction of stubborn fat that seems resistant to diet and exercise. SculpSure helps you to achieve a slimmer appearance in just 25 minutes without surgery or downtime.

SculpSure's innovative technology permanently destroys treated fat cells in problem areas such as the abdomen and love handles. Results can be seen in as quickly as 6 weeks, with optimal results usually seen in 12 weeks.

What it is:

- > Customized procedure based on desired results
- > Four applicators target specific trouble spots in a single session
- > No bruising as with suction-based technologies
- > Works on any body or skin type

How it works:

- > Destroys fat cells by raising the temperature of body fat
- > No damage to surrounding skin
- > Fat cells are naturally absorbed over time

Clinically tested and FDA cleared:

- > 24% average reduction in stubborn fat¹
- > Over 90% satisfaction rate²
- > Comfortable and well-tolerated treatment³
- > Results in 6 to 12 weeks

¹ Average reduction in fat volume following single treatment as measured by MRI; Clinical and Histological Evaluations of a 1060nm Laser Device for Non-Invasive Fat Reduction, John W. Decorato, M.D., FACS, Rafael Sierra, Ph.D., Bo Chen, Ph.D., Westford, MA, 2014.
